Dear Sir or Madam:

I am wanting to apply for the Graduate Software Engineer role in either Manchester or London. I am interested in working in a friendly environment and growing my knowledge of the cutting-edge technologies and techniques used by Thoughtworks. The prospect of spending time at the Thoughtworks university making new connections and growing my understanding is exciting.

I am incredibly focused and dedicated to learning new skills, this would be key to a graduate position. I am friendly and aim to work well with others as well as building team skills to improve myself. I always strive to produce quality with everything I do and can offer dedication to keeping a high level of quality.

Working in a consultancy is an excellent proposition and an opportunity I do not wish to miss. The projects and exemplar work done by Thoughtworks makes it my first stop when I finish university. I find that elegant solutions are something I wish to improve upon and cannot wait to gain more experience.

Thank you for considering my application.
